

Section 525.07(10), Florida Statutes, requires each person who owns or manages a retail petroleum fuel measuring device to have a security measure affixed to or installed onto the measuring device to restrict the unauthorized access of customer payment card information. The following measures are permissible:

Pressure-sensitive security tape placed over the panel opening that leads to the scanning device for the retail petroleum fuel measuring device in a manner that will restrict or give evidence to the unauthorized opening of the panel;

Electronic prevention in the form of a device or system that will render the retail petroleum fuel measuring device or the scanning device in the measuring device inoperable if there is an unauthorized opening of the panel;

A device or system that encrypts the customer payment card information in the scanning device so it cannot be skimmed or filtered; or

Other security measures approved by the department. Rule 5J-21.009, Florida Administrative Code, outlines the approval process. Contact the department for assistance at (850) 921-1570.

NOTICE: Any retail petroleum fuel measuring device or “pump” without a security measure or with an altered or damaged security measure shall have five calendar days to comply with the above requirement. After the fifth day of non-compliance, the department may prohibit further use of the pump until a security measure has been installed, replaced or repaired. Subsequent violations found on the same pump will be cause for the department to immediately take the pump out of service.

INFORMATION for BUSINESSES ADA ASSISTANCE and LABELING REQUIREMENTS for **GAS STATIONS**

Section 526.141(5), Florida Statutes, requires that a blue decal that is at least 15 square inches be applied to each dispenser, clearly displaying the international symbol of accessibility shown in s. 320.0842, the telephone number of the station and the words “Call for Assistance.” The decal must be attached on the upper fifty percent of the pump’s front panel or directly attached to a stand-alone unit located no more than 36 inches from either side of the motor fuel dispenser, at a height equivalent to the upper fifty percent of the pump’s front panel. In either case, the decal must be in a position clear and conspicuous from the driver’s position. If a stand-alone unit is used, it must contain controls to communicate directly with the self-service facility’s staff. (Rule 5J-21.007(5), F.A.C.)

Counties or municipalities may adopt an ordinance, or enforce an existing ordinance, that expands the accessibility, safety or availability of fueling assistance to a motor vehicle operator described above.

Additionally, every full-service gasoline station offering self-service at a lesser cost must require an attendant employed by the station to dispense gasoline from the self-service portion of the station to any motor vehicle properly displaying a Disabled Person Parking Permit, as provided in s. 316.1958 or s. 320.0848, or a Disabled Veterans License Plate, issued pursuant to s. 320.084, s. 320.0842, s. 320.0843 or s. 320.0845, when the permit holder is operating the vehicle and requests assistance. Stations shall prominently display a decal no larger than 8 square inches on the front of all self-service pumps clearly stating this requirement and the penalties for violations.
