

TREE SEEDLING DELIVERY

To obtain the freshest trees, customers are encouraged to pick seedlings up at Andrews Nursery. However, for an additional fee, the Florida Forest Service will deliver seedlings in refrigerated trucks to the locations listed in this brochure. We do not deliver seedlings to residences or planting sites. Customers should pick seedlings up on the scheduled delivery day or no more than three days after actual delivery. There are no delivery charges if you pick your seedlings up from Andrews Nursery.

In the interest of seedling quality, the Florida Forest Service will postpone lifting operations and subsequent delivery of bare root tree seedlings when weather conditions are unfavorable. If there are such postponements, customers will be notified of the revised delivery dates.

The delivery dates are listed for your convenience and do not necessarily reflect the optimum planting times.

WEEKLY Friday Deliveries:
Withlacoochee Forestry Center
(1519 Broad Street, Brooksville, FL 34601)

December....3, 10, 17

Seedling Descriptions

Improved 1st Generation Longleaf Pine
Deployable anywhere in Florida. Through careful selective breeding these seedlings have a general 10% increase in growth and disease resistance over wild collected longleaf.

Forest Source Longleaf Pine
Wild collected longleaf seed for use throughout Florida.

FFS Elite Slash Pine
Deployable anywhere in Florida. A blend of the three best families available in our orchard with an outstanding rust resistance and predicted volume gain of 16% over our 2nd generation rust resistant slash. 45% or better volume gain over wild type slash.

Improved 2nd Generation Rust Resistant Slash Pine
Deployable anywhere in Florida. Orchard mix from our rust resistant slash orchard with a good rust resistance and predicted volume gain of 25% over wild slash.

Forest Source South Florida Slash
A sub-species of typical slash pine. Useful for planting in the southern portions of Florida. Deployment outside of the natural range is not recommended.

Improved 1.5 Generation Florida Loblolly Pine
A fast-growing Florida strain loblolly with 10% improvement in volume gain, less sweep, and moderate rust resistance over wild type loblolly.

Forest Source Choctawhatchee Sand Pine
Suitable for planting state-wide. This sand pine variety is best suited to dry, sandy soils. It is recommended that bare root Choctawhatchee Sand Pine be planted January 1st or later for greater survival.

Bald Cypress
Often found in wetlands around streams or flowing water. Well suited for wet areas and wetland restoration.

Pond Cypress
Usually found in isolated depressions and pond wetlands. Well suited for wet areas and wetland restoration.
